Yerevan, RA

PROFESSIONAL EXPERIENCE

- 2015-2018** Was the Member of the Governing board of the Yerevan State College of Informatics.
- 2018** Completed a Software Engineering Internship at Yerevan Computer Research Development Institute (Mergelyan Institute)..
- 2018-2019** Worked at "AYB Legal and Community Centre NGO" as an IT advisor.
- Created and updated a database for beneficiaries.
 - Supported the functionality and security of local personal computers within the system.
- 2022-now** Working at YourCapitalist.com as a Full Stack Engineer.
- Developed the responsive mobile navigation menu using React, including interactive dropdowns for lessons and calculators, a toggle for menu visibility, and smooth animations with framer-motion.
 - Ensured a seamless user experience on smaller screens.
 - Developed interactive carousels for Financial Lessons, Latest Financial News and Financial Calculators sections using React and Swiper. Implemented autoplay functionality, smooth sliding effects, and responsive design to enhance user engagement.
 - Designed and implemented the core application layout in React, integrating key components such as the Navbar, Advertisements and Footer to ensure a consistent user interface across the application.
 - Developed and implemented the backend search functionality using Node.js, enabling users to find relevant content across the platform.
 - Continuously monitored and optimized website performance, resulting in periodic improvements to loading speed and a reduced Largest Contentful Paint (LCP).
- 2024-2025** Worked at Fido Invest CJSC as a Full Stack Engineer.
- Implemented INSERT statements for efficient and accurate onboarding of new security data, focusing on key fields such as ISIN, issue and maturity dates, ticker symbol, and the reference URL.
 - Proactively enhanced application quality and user experience by identifying and resolving UI/UX bugs across the web page, mobile app, and admin profile, contributing to platform stability and reliability.
 - As part of my Meta Developer Integration research, I provided guidance emphasizing best practices for the secure handling of sensitive elements like the shared secret, class names, and key hashes, crucial for a robust and reliable integration.
- 2025-now** Working at Ardshinbank OJSC as a Full Stack Engineer.
- Worked on the admin panel of Core Domain Services project.

SUMMARY

Hi. I'm a Full-Stack Software Engineer. Having more than 3 years of experience in building end-to-end web applications, I specialize in TypeScript, React and Tailwind CSS to create mobile, tab and desktop interfaces. With a strong foundation in Computer Science and practical back-end skills, I help design scalable, user-focused products which solve real business problems. I'm passionate about clean, maintainable code and building polished experiences that strike the right balance between great design and real functionality.
